## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

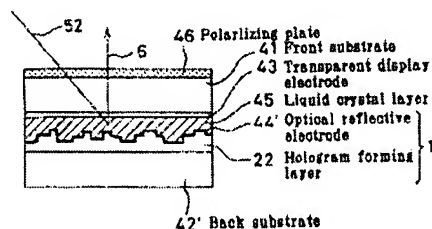

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 8 and 11-12 are rejected under 35 U.S.C. 102(e) as being anticipated by US 20020001109 A1 (109).**

FIG. 18

109 teaches a first panel for a liquid crystal display, the panel comprising: an insulating substrate [42]; and a light diffraction layer formed directly on an inner surface or an outer surface of the substrate and having a slit pattern or a diffraction lattice for diffracting [22] light passing through an liquid crystal layer [light 52, liquid crystal 45]; a common electrode formed on the light diffraction layer [44']; a second panel facing the first panel [41] and liquid crystal [45], wherein the width and interval of the slit pattern of the light diffraction layer have at least two different values in each pixel area [see figure 18, some of the widths are uniform and some are not, thus both uniform and non-uniform are taught]; wherein width and interval of the slit pattern of the light diffraction layer are equal to or less than seven microns [column 30, line 5, the slit space is 7 microns] and wherein first panel of any one of claims 1 through 7 comprise a second panel facing the first panel [12]; and a liquid crystal layer interposed between the first panel and the second panel.

Art Unit: 2871

Per claim 13, in some embodiment the light passes through the layer 22 and layer 22 is formed from a resin.

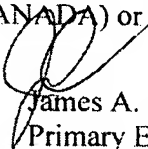

***Response to Arguments***

Applicant's arguments are moot in view of the new ground(s) of rejection.
